Garden

S. S. BERRY

1145 W. Highland Avenue REDLANDS, CALIF.

FOREWORD

This is the ninth edition of our little catalog. As usual, it must find its embellishment, not in brilliant color plates or expensive typography. but in the class of offerings it sets forth. In spite of steady elimination of varieties no longer considered useful to us, ours is still one of the largest study collections of Iris on the Pacific Coast, and as the resources of three other large private collections are also available to us through arrangement with their owners, it means that in spite of our limited space we can generally meet reasonable demand and in special cases often furnish quite large quantities. We never attempt to offer at one time a full list of the 1000 or more varieties which our collection includes, so in case of specific desiderata unmentioned in this booklet special inquiry is invited.

We have somewhere seen it stated that one can feel no depression in a garden. We doubt if this be strictly true, still it is an incomplete expression of a truth. A garden, be it ever so tiny, is an epitome of life. It has, always will have, its discouragements as its joys, its obstacles as its triumphs, slimy slugs, bugs, aphis, and, most futile of all its denizens, the cutworms, which destroy in bud or seed the very tree of life which succors them; all these as well as the busy bees, the chirping tree frogs, the ioyous song-sparrows, and the darting hummingbirds. Alas, we find in human life that there may be cutworms as well, but so too may there be bees and songbirds. Why is it then that in time of travail the garden means so much of cheer and is so unfailing a purveyor of peace of mind and faith and renewal of hope to those who seek its solace? Is it not because it so unfailingly rises above its own vicissitudes? No matter what befalls, ever so sad the disaster which has come to it, lo, soon the damage is ameliorated, the flowers bloom again, we find we still have much to enjoy, much to

look forward to, much to share with those less blest.

We may work in our garden, we may only loaf there, but, working or loafing, if we do it with due philosophy assuredly will we find that both we and the world are curiously the better. And it is a cumulative betterment. Of all too few human activities of the day can this properly be alleged. So we need not apologize for continuing loyalty to our gardens. They will

repay in manifold. So far as we are concerned happiness constantly fills our hearts not alone for our garden but for the many kind folk who continue to inspire us by their friendship, their counsel, or their custom, without all of which our work could not well be carried on. At this time we appreciate it more than ever before as it helps us to see through to the first fruits of the longstudied program of breeding upon which we have been engaged so many years and the real possibilities of which are only just beginning to reveal themselves. From among these our little catalog and with it your garden will henceforth be steadily richer and we hope that as more and more of the lovely blossoms unfurl to view you will realize how very much your own part has counted in it and that yours too is much of the responsibility for what has been possible.

We wish that more of you who are at a distance from us could have shared the beauty of our daffodils and irises this particular spring, even though ours be mainly an outdoor workshop and makes small pretense as a show garden. It was a queer season—all wet and cold from November to February, then a blazing dry March, and then at last our longed-for good weather the latter part of April and May. It did not suit some things, especially the early irises which were about the poorest we have ever known them, but during daffodil time we were rich in garden beauty, with several hundred varieties in flower, a good number of them, we believe, for the first time on this con-

tinent. But our greatest display was to come when, with all the shows over, the mid-season and later irises blazoned out and gave us by far the longest continued and finest showing of these, both of named varieties and of seedlings. we have ever had. It has been an established policy with us to introduce very few new irises in any one season no matter how many good ones might emerge from their spathes to tempt us. Therefore this year out of multifarious riches to choose from we have pushed aside various promising candidates and determined upon simply the four which are described on a later page-Colonial (named in celebration of the Washington bicentenary), Erebus, Mazama. and Penumbra, each of which we can recommend to you as a beautiful iris of sterling quality and not, so far as we are aware, a duplicate of anything at present in commerce.

Probably the ten finest mature clumps of tall bearded irises that we saw this year outside of seedlings not yet in commerce were: Acropolis, Purissima, Mauna Loa, San Gabriel, W. R. Dykes, Osprey, Los Angeles, El Capitan, Sequoiah, and Mazama. Of course such a list varies every season and in fact can never be twice alike, but we find it interesting to check over our old notes and see how frequently some of these names reappear. A purchaser will not go astray on any of them for a good while to come.

SOME SPECIAL SUGGESTIONS

BLUE-TONED IRISES

If you have learned the beauty of blue when freely used in the garden you may be glad of the ensuing list of varieties which tend more definitely than most toward that effect, as they range principally in Ridgway's beautiful columns of true violet. Of all these we think Ariel, Cretan, Lady Charles Allom, Perladonna. and Wedgwood particularly desirable for use in considerable quantity.

I. Light Tones:

Ariel (e) Corrida (l)
Bluet (m) Pacific (e)
Claridad (m)

II. Medium Tones:

Blue Bird Perladonna (l)
Blue Lagoon Realm (m)
California Blue (e) Sensation (l)
Docteur Chobaut (m)
Lady Charles Allom (m)

III. Deeper Tones:

Cretan (e) Joya (l) Harmony (m)

Wedgwood, Lady Charles Allom, and Perladonna.

Mystic and Dione.
Ariel and Lady Charles Allom.
Mauna Loa and Morning Splendor.
Citronella or Argynnis and Solana.

h

For Immediate Garden Effect

We strongly recommend planting in groups of 3 or 5 rhizomes of a kind. Such a number may often be supplied at an appreciable reduction from the regular per unit price.

CULTURAL NOTE

The culture of Irises depends mainly upon the particular group or type to which the plants belong. That of the majority of the Pogoniris or bearded group is very simple. Abstention from the use of retentive manure, a fair amount of lime in the soil, and good drainage are the principal points to attend to. The rhizome should be set in the earth at time of planting with the roots carefully spread and the soil well firmed about them, but the top of the rhizome only barely or not quite covered. They should ordinarily be watered well when first set, but more moderately thereafter. In Southern California the most successful Iris growers are those who irrigate their plantations occasionally through the summer, perhaps every few weeks like a citrus orchard, following each watering with a light cultivation.

For fertilizer we have found bone-meal, superphosphate of lime, wood ashes, and old

plaster rubble all excellent.

Occasionally someone reports inability to make established plants of Irises flower. It is not always easy to assign a cause for this, but quite often too deep planting seems to be responsible, or again it may be too much shade. Sometimes just breaking up the clump and moving to a new position is sufficient to start it going in the right way.

Under our brilliant sun it is often surprising how much shade some of the varieties will stand and still yield a certain percentage of bloom, but a rather open position is generally best for the Pogonirises, as well as for the

unguicularis, spuria, and ensata types.

Ridging the beds or planting on a slope is often resorted to with notable success.

Apogon Irises require somewhat more moisture and humus in the soil as a rule, and many of them dislike lime. For some groups, notably Oncocyclus and Regelia, quite special treatment is demanded—lighter soil, plenty of sunshine, extra care in drainage, abundance of lime, and no water in summer even if they have to be taken up and stored dry.

Most of the Evansias prefer considerable shade and are among the few Irises which do

their best under such conditions.

For the common and disfiguring disease called leaf-spot, spray thoroughly with lime-sulphur in winter before growth is too far advanced and keep the diseased foliage well picked off and burned thereafter as it appears.

A WORD AS TO PRICES

Accepting the current business conditions as a challenge, we are charting our course to meet them in two ways-firstly, a reduction in prices pretty much all along the line to accord with the new general level, and secondly a relentless elimination of less worth-while kinds no matter how greatly advertised. Their places are taken in the list by an exceedingly fine line of the newer things, French, English, and American. These, together with our own new introductions, bring our collection to a fresh high level of excellence and render it a treasure mine which will repay your most careful attention. Were the same principle more generally carried out in private gardens, the joy and thrill of each new year would be as great as during the preceding one, interest would never flag, and the cumulative effect upon American horticulture would be something beyond our dreams. The merely good, in gardening as in so many other pursuits, is ever the enemy of the best. And never before have so many really splendid irises been available so cheaply as this year of 1932-33.

TERMS

Cash with order or references.

Fulfillment of all orders subject to stock on

hand.

Prices are for strong, single rhizomes. The Iris borer has not yet come into our garden and every care is taken to keep stock as free as possible of rot and other troubles.

Where stock permits, twelve roots of a variety will be supplied for the price of ten, and in the case of a variety priced at \$1 per plant or less, it is our policy to supply THREE for the price of TWO.

We offer no guaranty except to do our best, but should stock sent prove untrue to name, every effort will be made to replace same satisfactorily.

Paid orders to value of \$5 or over sent carriage free to any part of U. S., but where customer includes allowance for postage with order, extra plants will be sent to cover same.

Orders for plants, when accompanied by cash, except in the case of scarce novelties or special collections, are privileged to an additional selec-

tion of plants as follows:

Orders of \$10 to \$25 entitled to 5% additional. Orders of \$25 to \$50 entitled to 10% additional. Orders of \$50 or over entitled to 15% additional.

OUR OWN INTRODUCTIONS

Q)

- *BERNARDINO (1931). H. M., A. I. S. This is an enormous tall lavender and rosy purple bicolor of beautiful symmetry and carrying effect in the garden. Of Dominion parentage, it has been outstanding even among its relatives. This grand plant is in a class with Mauna Loa and Acropolis for magnificence. Early; 4 ft. or over......\$20.00

- *PENUMBRA (1932). A deep bicolor of striking contrast between the glowing yellow of the throat and the Vinaceous Drab S. on the one hand and deep Violet Carmine F. on the other, the sudden changes in the flower from light to shadow thus suggesting the name. The Pyrite Yellow haft is heavily veined Mars Brown, the beard solid Cadmium Yellow. It is a pity that the singularly apt name

Paisley proved unavailable for this distinctive iris; 3-3½ ft......\$10.00

*EREBUS (1932). A very tall rich blackish purple bicolor with deep brown shading in the throat, of royal garden effect and striking exhibition quality; 4-5 ft......\$20.00

*MAZAMA (1932). This strong-growing rosetoned bicolor has been one of our most admired irises this season. The Pansy Purple falls show from afar. It is a somewhat complex derivative from Mauna Loa with just a touch of Dominion added. Though so large it has only ½ mesopotamica and its other ancestors are all hardy ones; 4-4½ ft........\$25.00

SPECIAL COLLECTION OFFER

One each of our entire series of introductions, old and new, at present prices would come to \$138.50. However, if ordered together, we can make a net cash price of \$100 for the set. The four for 1932, totaling \$65 in value, will be supplied for \$50 net.

WILD TYPES OF POGONIRIS

We are especially interested in the wild forms of Iris and have a considerable collection of which the following of the bearded Irises are now available in more or less surplus. They are particularly interesting to those concerned in breeding work or botanically inclined, but most are likewise fine garden plants.

Como. A pallida collected in Italy by Farrer...\$1
Cretan. Early rich deep violet germanica, especially brilliant when first opening...........50

Florentina. Early mid-season white......25

Istria. Cool white with hint of green, from
near Fiume\$1.00
Kerman. Large Persian germanica\$1.00
Kochii. Dark violet; early50
Madonna. Alleged blue form of albicans\$1.00
Mesopotamica. Enormous Asiatic angestor of
many of our finest hybrids
Nepalensis. Black-violet form of kochii50
Pallida. Lovely tall lavender25
Pallida Dalmatica. A larger and darker form .35
Reichenbachii. Dwarf yellow Balkan type50
Rocamadour. Attractive early germanica from
France\$2.50
Syracuse. Fine Sicilian form of albicans\$2.00
Trojana. Well-branched violet bicolor75
Tromagnifica. Tall variant form50
Trosuperba. Tall variant of trojana
Variegata. Wild form of true species originally from Sir Michael Foster's garden\$1.50

POGONIRIS—GARDEN VARIETIES

Duly allowing for personal preferences and special conditions, we have found all the varieties offered in the present list which we have had long enough for fair testing to be worth growing.

Varieties having the names printed in capitals are in a way specialties of ours, and of these we have developed a particularly fine stock. These are all highly recommended.

Varieties marked with an asterisk are mostly quite new sorts of which we have only very

limited stocks as yet.

We are shortening the description of many of the older varieties in order to make room for the more lengthy notices required of the newer ones. More detailed descriptions can be found in the publications of the A. I. S., as well as in our older catalogues, some of which are still available for those who care to send postage for the mailing.

Abenda (Perry). Tall reddish blend\$.50
Acheron (Sturtevant). Rich dark purple; 3 feet50
Afterglow (Sturt.). Yellow-lavender blend25
Airy Dream (Sturt.). Tall ruffled orchid; late \$6
Alameda (Mohr-Mitchell). Large fragrant plicata50
Albert Victor (Barr). Deep lavender pallida25
Alcazar (Vilmorin). Large bronze-purple25
Aliquippa (Hall). Lovely soft yellow\$1.00
Allure (Murrell). Enchanting pale orchid- flushed yellow blend; late and the better for some shade\$1.50
*Alta California (MM.). Huge new 4 ft. yellow\$25.00 Ambassadeur (Vil.). Violet and blackish ma-
roon; late35
*Ambrosia (Sturt.). Dainty pink-toned white\$5
Amerind (Andrews). 3½ ft., tawny brown75
*Andrew Jackson (Kirkland). Deep red-violet; 40 in\$2.00
Anna Farr (Farr). Refined plicata50
*Anndelia (Sturt.). Dainty new rose-stippled plicata\$5.00
*Anne-Marie Cayeux (Cayeux). Handsome, tall smooth lilac blend; very distinctive\$12.00
Ann Page (Hort). Large 3 ft., blue-lavender25
Anosia (Williamson). Bronzy gold and maroon; late25
Antonio (Hort). Immense violet bicolor50
APHRODITE (Dykes). Orchid-toned; smooth- ly finished50
*Apollo (Wallace). Large blue-violet; 3½ ft.; new\$1.00
Archeveque (Vil.). Rich velvety purple; low25
Argentina (Mohr). Early white; valuable parent
Argonaut (Bliss). Airy lavender pallida35

Argynnis (Wmsn.). 3 ft. maroon and gold bi- color; late
ARIEL (Mur.). Ethereal harebell-blue English variety of charming garden effect
Arnols (Barr). Late dark bronze25
Arsace (Millet). Tall grayish lilac
Asia (Yeld). Beautiful late light lavender bi- color; often requires staking35
ASPHODEL (Morrison). Exquisite tall, cleartoned lavender\$1.00
Athanael (Mil.). Huge red-toned; striking effect\$2.00
Athene (Sturt.). Lovely white with contrasting venation in throat
AURELLE (Denis). Rich crimson purple75
AURIFERO (MM.). Lovely pearly lavender with yellow throat50
Aurora (Foster). Dainty pinkish lilac50
Autocrat (Cleveland). Veined violet bicolor25
The state of the s

*Autumn Glow (Sturt.). 3 ft. amber\$1.50 Autumn King (H. P. Sass). Autumn-blooming violet-purple
*Autumn Glow (Sturt.). 3 ft. amber\$1.50 Autumn King (H. P. Sass). Autumn-blooming violet-purple

Bernard Galloway (Per.). Neat lavender; 3 ft25
Bertrand (Bliss). Large rounded flowers; Dominion-race; good grower75
Black Prince (Per.). Rich violet and black- purple bicolor; late and should be planted away from any drip to avoid marring the heavy velvet of the falls; 2 ft50
Blue Bird (Bliss). Blue-violet50
Bluet (Sturt.). Dainty blue-toned lavender 50
*BLUE VELVET (Loomis). Rich, deep violet self, paling toward margin of F.; a noted member of a noted race
Bonita (MM.). 34-in. yellow self
Brandywine (Farr). Blue-lavender; late50
BRAVURA (Mohr). Giant lilac-purple; strong growth; 40 in
Brilliant (Bliss). Late reddish35
*Bruno (Bliss). Velvety bronzy purple\$1.00
B. Y. Morrison (Sturt.). Deep violet F. with lavender edging matching the S.; slow grower
California Blue (Essig). Immense bluish violet; early
Cameleon (Lemon). Medium-sized, narrow- petaled lavender flowers with deeper veining, and of peculiar garden charm; late25
Cameliard (Sturt.). Large wine-purple and yellow bicolor blend of brilliant garden effect; 3½-4 ft
Camelot (Bliss). Very tall plicata25
Cameo (Sturt.). Fresh and dainty blended yellow bicolor; 3 ft50
Camilla Dubuar (Lapham). Delicate creamy pinkish\$3.50
Candlelight (And.). Soft yellow-lavender blend; very late
Caprice (Vil.). Bright red-lilac25
Carcanet (Sturt.). Dainty light yellow25

Carnival (Wmsn.). Purple and tawny variegata; 2 ft25
Caroline E. Stringer (J. Sass). Pale Rose Purple self50
Carthusian. Large deep-blue lavender50
Cassandra. (Per.). Tall lavender and violet75
Caterina (Fos.). Large light blue-lavender35
CAVALCADE (Sturt.). A sturdy big variegata
of striking garden effect and one of the most recommendable for California; 3 ft\$3.50
Celeste (Lem.). Lovely pale lavender of medium size
termediate\$2.00
Chief (J. Sass). Royal-purple intermediate50
Chlorinda (Mor.). Large soft yellow; 2 ft50
Circe (Sturt.). Quaintly marked violet25
Citronella (Bliss). Variegata with illuminated yellow standards35
Claridad (Mohr). Clear lavender blue25
Clio (Verdier). Good lavender pallida35
*Clytemnestra (Wal.). A striking big violet bi- color with lighter margins to falls; 40 in. \$5.00
Colias (Wmsn.). Clear light yellow; late; to 3
ft25
Col. Candelot (Mil.). Small near-red; late25
Colusa (MM.). Petunia-violet self; 40 in35
Commandant Driant (Mil.). Early bicolor dwarf50
Conchita (MM.). Light red-lined bronze; 30 in35
Conchobar (Bliss). Velvety violet bicolor of
Dominion blood
Cooley Surprise (Cooley). Large violet self; 4 ft\$3.00
*Corona (Sturt.). New yellow and white bi-
color\$10.00

Coronado (Mohr). Lilac bicolor suffused yellow; 3 ft25
*Coronation (Moore). Rich deep yellow\$1.25
Corrida (Mil.). Charming blue-lavender25
Crimson Glow (Per.). Large reddish-lilac35
Crimson King (Barr). Deep red-purple self, blooming all through year in California25
Crusader (Fos.). Large blue-violet25
*Crysoro (Nichols). Early deep yellow; 2 ft. new
Curiosity (Per.). Brownish dwarf; early35 Cygnet (Sturt.). Tall and chaste ivory; 4 ft50 Dainty Lady (Weed). Small yellow-lavender blend
blend25 *Damascus (Wal.). Large violet bicolor; 40 in\$3.50
in
*Dariel (Baker). Large deep violet\$2.00
*Day Dream (Sturt.). Warm pink-toned blend suffused yellow\$2.50
Dejah (Per.). Tall deep lavender pallida35
Dejazet (Vil.). Soft brownish blend25
Delicatissima (Mil.). Dainty pink-lavender25
DELIGHT (Sturt.). Most chaste and stately of white plicatas, toning to orchid in the heart

Zephyr. Dainty pale lavender; small, neat35
Zilia (Per.). Tall hybrid pallida35
Zulu (Bliss). Dark purple "Dominion"\$1.00

POGONO-CYCLUS AND POGONO-REGELIA

The following hybrids of various Oncocyclus and Regelia Irises with members of the Pogoniris group are interesting and not unduly difficult of culture:

Bellorio (Mohr). Soft gray-lavender35
*Congres (Cay.). Deep reddish bicolor, very
distinct from others of the series\$2.50
Dalkish (Foster). Conspicuously veined\$1.00
Dorak (Foster). Another of the strongly veined purple forms\$1.00
distinct things under this name but have been unable to discover which is true. Both are beautiful Irises50
IB-MACRANTHA (Van Tubergen). A striking lavender and red-purple bicolor with bronze shadings; rounded flowers\$1.50
Ibpall (Foster). Purple-veined\$1.00
Ismali (Foster). \$1.00
Korolcyp. A pigmy French importation which looks like a small purple pumila but is claimed to have korolkowi blood\$1.00
Lady Lilford (Foster). Handsome purple\$1.00
Morera (MM.). Mulberry purple korolkowi hybrid50
Nazarin (Foster). Another of the interesting purple-veined forms50
Nefert (Foster). Soft blue without markings except the darker signal; quite handsome and different from others of the type\$1.00
Pandora (Foster). \$2.00
Semele (Foster). \$2.00
Shiraz (Foster)
WILLIAM MOHR (Mohr). The result of a parisiana-Gatesii cross and one of the most extraordinary hybrid Irises ever raised. A magnificent Iris for exhibition; demands perfect drainage. We hold a fine stock\$1.25 (3 for \$3.00).
Zwanenburg (Denis). An odd brownish flower with purple splashes35c, 4 for \$1.00

ONCOCYCLUS

Early summer or fall delivery only)
*Susiana. Grayish white veined black-maroon;
. 35

the somber but beautiful "Mourning Iris." We are not sure that our small present surplus will care for more than the current advance orders. If available, each................\$1.50

REGELIA

(Early summer or fall delivery only)

*Hoogiana. Clear satiny lavender blue. Working up a stock acclimated to our heavy soil has proven quite difficult and at present only a few surplus roots are available.....\$2.00

*Leichtlinii. A variant form of stolonifera..\$3.50 *Orestes (Van Tub.). Beautiful ruddy brown \$2

Turkoman (Dykes). Another korolkowi-stolonifera hybrid which to our notion is one of the loveliest hybrid Irises ever raised. Only a few for sale......\$2.00

*Vaga. Another interesting variant of the stolonifera group\$3.50

REGELIO-CYCLUS

(Early summer or fall delivery only)

The following are beautiful but not, we think, altogether easy to handle. They should be treated the same as the Oncocycli. We have

been a long time trying to work up a small California-grown stock.
Charon (Van Tub.). Golden brown; one of the
most beautiful of this group\$1.50
*Flora (Van Tub.). Wine and brown; heavily veined\$2.50
*Hebe (Van Tub.). Violet venation on pearly ground\$1.00 *Hera (Van Tub.). Violet-purple with ruby and
*Hera (Van Tub.). Violet-purple with ruby and
*Hesperia (Van Tub.). Lilac with brownish
veins\$2.50
EVANSIA
Cristata. A tiny wild species from North Caro-
lina; likes partial shade35
Gracilipes. This woodland elf is practicable in
southern California gardens only under
special conditions; shade and loose woodsy
earth which is not allowed to bake out. Of-
fered subject to condition of stock\$1.50
JAPONICA a. Fleeting light blue flowers with
delicate mottling; the spikes keep flowering
over a long season; likes partial shade\$1.00
JAPONICA b. Paler blue than preceding35
*Milesii. A rare form from the Himalayas\$3.00
*Paltec (Den.). Interesting pallida-tectorum
hybrid
Tectorum. The well known Roof Iris; flat blue-
purple flowers with a conspicuously fringed
white crest50
Tectorum Alba. The exquisite white form of
the preceding\$2.50
WATTII. An amazing Iris from the south-
eastern slopes of the Himalayas with a habit
somewhat recalling a dwarf bamboo: flowers
somewhat recalling a dwarf bamboo; flowers white or slightly tinted, borne in airy panicles
over a long season; scarcely known to Amer-
ican horticulture as yet and therefore of un-
tested hardiness in most parts of the country,
but in Southern California at least in no re-
spect a difficult subject\$1.00
37

APOGON

American Species

•
CACIQUE. (See introductions).
*Chrysophenicia. Tall reddish purple from
Louisiana\$2.50
Foliosa b. A particularly lovely collected form
from Mississippi50
Fulva. Interesting bronze-red form from the south\$1.00
Dorothea K. Williamson (Williamson). The most brilliantly colored Iris in this group, saving Sagamore
SAGAMORE. (See introductions).
SAVANNARUM. Handsome, tall blue Apogon from the Florida swamps, which has proven very amenable to California cultivatino\$1.00
Shrevei. A beautiful wild lavender Iris from Arkansas50
Shrevei b. White, bordered pale lavender; exceptionally fine foliage; a delightful and interesting subject, especially adapted to a rather moist position
Mediterranean Group
(Winter flowering)
Unguicularis, Light violet
*Unguicularis Lilacina. An imported form highly thought of in England50

UNGUICULARIS VIOLACEA. The most luxuriant grower among the exquisite winter-flowering Mediterranean Irises. This is what we formerly listed as Marginata, but as there is a form going under this name which is much more conspicuously margined as well as less rampant, it seems best to use some other appellation for the present form. Lovely for long borders; September to April.....25 (Per 100, \$20.00; good clumps, 50c each).

UNGUICULARIS ALBA. White and gold; slightly shorter blooming season than preceding. Says the inimitable Farrer, "It is a flower straight from heaven—a transcended snowy Crocus or Zephyranthes." Same price. *Queen Elizabeth. Smallblue-lavenderwith white venation
Spuria Group
(Fall and winter delivery only)
A. J. Balfour. Fine, tall, blue\$1.00
*ALICE EASTWOOD (Branin). A magnificent ochroleuca hybrid. One of the handsomest Irises in this group
Graminea. Dwarf purple grassy-leaved species
suitable for rock garden or low border; frag-
rance of ripe plums\$1.50 *Halophila lutea. Small, creamy; 2 ft\$1.00
Juno. An interesting blue-purple of the Mon- spur type\$1.00
Lord Wolseley. Handsome blue-purple hybrid; tall75
Monaurea. Tall, medium-toned yellow\$1.50
Monnieri. Moderately tall, soft yellow75

Ochroleuca Snowflake. A beautiful variant form; tall50
Ochroleuca Warei. A very handsome variant of ochroleuca
*Queen Victoria. A splendid tall cream and gold Iris\$2.50
SHELFORD GIANT. One of the grandest plants in the group\$2.50
Spuria. Lavender-blue50
Siberian Group
(Fall and winter delivery only)
*CAEZAR (Morgan). We are very fortunate in being able to offer a few plants of this superb new deep violet Siberian\$3.50
*Delavayi. Interesting tall blue species from Western China. We have a very few acclimated plants\$1.00
Emperor. Magnificent dark blue collected form; easy50
Florrie Ridler (Perry). Deep blue
Lady Northcliffe (Perry). Deep violet with white throat
Perry's Blue. Fine light blue50
Perry's Pigmy. Dwarf blue50
Snow Queen. Snowy white, yellow throat50 *Whitehill. (See introductions).
Miscellaneous
ENSATA. Asiatic species; small fleeting lavender flowers over a long period\$1.00
Foetidissima. The Gladwyn Iris; an exceptionally fine strain with handsome deep green leaves, and flowers varying from greenish and light yellow tones to bright red-purple; ornamental pods of bright scarlet seeds in fall\$1.00
Japanese Iris, Alice Kiernan. The loveliest of
this type we have grown; crepy white with a blue misting on the fall; fall and winter de-
livery only\$1.50

*Japanese			Beauty.		
Pseudacor	us Gi	gantea.	A giant	yellow	marsh

flag; very fine for a moist place.....50

JUNO

(Early summer or fall delivery)

*Persica. A ravishing combination of grayish lilac, sea green, and brown; an easy Iris to manage in some soils, in others almost impossible. Offered subject to stock...........\$1.50

OTHER BULBOUS TYPES

(Early summer or fall delivery)

Our little stock of these never lasts long and orders should get in early.

*Histrio. Quaintly marked small lavender species from Galilee\$1.50

*Reticulata. A very few bulbs to offer of this small brilliantly colored species......75

SPECIAL COLLECTIONS

Some suggestions for those uncertain how to choose, or who wish a pleasing gift for a gardening friend. All collections are carefully labeled.

IN TIME OF DEPRESSION

"We who believe that the garden affords the best possible restorative mechanism to worn humanity want that agency to have its fullest usefulness now. The garden advantages gained because there is more time for the garden are never wholly lost, and even a boom will not dissipate these advantages. So I write in the hope that others who read will open their gardens fully, will nurture them thoughtfully, and will thus give that best aid to the depression difficulty which comes from contemplation of and working with the things that God has caused to grow on and in this fair land."

> I. Horace McFarland. In HORTICULTURE.

This is one of the few American magazines which has maintained and even elevated its standards through all these recent trying years of popular madness. If you do not know it, you should make its acquaintance. If you do not have it, you should get it,—bi-monthly, and only \$1 a year. Address HORTICULTURE, Horticultural Hall, Boston, Mass.

And then, while you are at it, join

The American Iris Society

It publishes four Bulletins a year and brings to its members all the latest news about Iris. It will help you enjoy your garden more, and will prevent your making many mistakes.

Membership is \$3.00 a year. The money may be sent to us or directly to the Secretary of the Society, Mr. J. B. Wallace, Jr., 129 Church Street, New Haven, Conn.

Include these two subscriptions with your order and we will send you a dollar iris free as an extra.
